## ORGANIZATIONAL DEVELOPMENT AND HUMAN RESOURCE MANAGEMENT

5 ECTS

### COURSE DESCRIPTION

Human resource management (HRM) is a comprehensive and coherent approach to the employment and development of people. HRM can be regarded as a philosophy about how people should be managed, which is underpinned by a number of theories relating to the behaviour of people and organizations. It is concerned with the contribution it can make to improve organizational effectiveness through people but it is, or should be, equally concerned with the ethical dimension – how people should be treated in accordance with a set of moral values. HRM involves the application of policies and practices in the fields of organization design and development, employee resourcing, learning and development, performance and reward and the provision of services that enhance the well-being of employees. These are based on human resource (HR) strategies that are integrated with one another and aligned to the business strategy.

HRM indeed aims to support the achievement of business goals but, equally, it should aim to build a relationship based on trust, openness and personal fulfilment. This first part of this course deals with the broad areas and concerns of the practice of HRM covering its conceptual basis, the strategic framework within which HRM activities take place and the various factors that affect it, including the impact of HRM on performance, the specific functions of human capital management, knowledge management and competency-based HRM and importantly, the ethical and social responsible considerations that need to be taken into account when practising HRM.

### OBJECTIVES

On completing this course students should be able to define these key concepts. Students should also know about:

- The fundamental concept of HRM and how it developed
- The meaning of HRM
- The goals of HRM
- The philosophy of HRM
- The underpinning theories
- The reservations made about HRM
- Models of HRM
- The position of HRM today

### LECTURING METHOD

The course will use lecturing, discussion, and assignment method.

## ASSESSMENT METHOD

Class attendance 10 %,  
Class participation and assignments 30 %,  
Mid-term exam 30 %,  
Final exam 30 %

## ACADEMIC RESEARCH

This course includes an academic research paper that must be completed during your semester. It will be based on a topic given by the lecturer and requires comprehensive research by the student. This paper will consist of methodological analysis of the latest literature and be handed in at the end of the semester. The academic research will be included in the final course grade.
