Name: Svenja Fillep-Kühn

Title: Head of International Office

Institution: European University of Applied Sciences (EUFH)

1. How important is Asia considering the whole student mobility of your institution?

Asia has definitely been a destination that students are highly interested in at our institution. Roughly, 10-15% of our students decide for a semester abroad in Asia.

2. What have been the benefits of working with Asia Exchange for the university and the students?

Working with Asia Exchange is a trustful cooperation for us as the International Office but also for the students. Asia Exchange is a reliable partner when it comes to quality of information, communication and customer service.

3. Which destinations in Asia have been especially popular among the students from your institution? What has been the role of Asia Exchange supplementing your own network in these destinations?

Our students love to go to Bali, South Korea and Thailand. We do have our own exchange partnerships in South Korea, but we do not have enough exchange places for all students. In Bali and Thailand we do not have exchange partnerships so going via Asia Exchange is a great alternative for the students.

4. Why would you recommend us to your colleagues?

Asia Exchange supports us in our work: we can focus on the university partnerships that our own university has, but students also have the opportunity to choose other host universities via the competent service of Asia Exchange. I think it's a win-win situation.

5. What would you tell a university looking to collaborate with Asia Exchange?

You have nothing to lose – give it a go and find out about the advantages for your students and you.
